Wood burning heater Harvia Legend 240 BimSchV2

WKLE20M10

The Harvia Legend wood burning heaters give you the ultimate sauna experience. The black steel frame has a mighty amount of stones inside, and as they heat up, you get a magnificent sauna bath even at a lower temperature. The large number of stones ensures good heat, even if the fire dies down in between. The fire chamber of Legend heaters has a modern grate structure that separates the combustion air. Part of the air is directed to the upper part of the fire chamber. This way the burning is cleaner and more efficient. This grate structure also gives the heater a longer lifespan. The smaller than usual safety distances from the side and back surfaces to burning materials enable you to locate the benches more freely. The Legend heaters can be equipped with a pipe-mounted water heater. The Harvia Legend 240 is an excellent choice for a medium sized sauna. It is equipped with a cast-iron glass door, allowing the warm glow of the fire to complement the sauna atmosphere. The adjustable legs make the heater easy to place in the sauna. The heater has CE and Bimschv2 approvals.
